

Shashwat Vaish

shashwatvaish1@gmail.com — +91 7303202941 — [LinkedIn](#) — [Portfolio](#)

Professional Summary

Software Engineer experienced in building and scaling production web applications end-to-end, spanning **architecture**, back-end services, and user-facing interfaces. Skilled in translating product requirements into reliable features, optimizing **performance** and maintainability, and collaborating across teams to ship customer-facing solutions in fast-paced environments.

Experience

Software Development Engineer Intern — Indiagold

June 2026 - Present

- Collaborated with cross-functional teams to develop end-to-end production features across **web apps, dashboards**, contributing to **e-KYC**, **LTV**-based eligibility, and loan disbursal workflows
- Built a **co-lending** integration enabling loan origination for the company's **NBFC** arm, and shipped a **pre-approval journey** that surfaces eligible offers upfront and accelerating customer onboarding
- Audited a legacy **React.js** codebase, identifying 70+ improvement areas and executing a **12-week modernization plan**, removing **~22K** lines of code and reducing build time by **~30%**

Projects

Vibecode Editor - Interactive Online IDE

[vibe-code-editor.app](#)

- Built a browser-based IDE using **WebContainers** and **Monaco Editor** with an interactive **Xterm terminal**, enabling end-to-end application execution entirely in-browser without local setup
- Architected an AI-powered inline code completion pipeline that analyzes cursor position, language, framework, and surrounding code powered by **Llama-3.1-8B-Instant** (Groq API), delivering **<300ms average latency**

Karya - Async Task Processing Platform

[karya.vercel.app](#)

- Engineered an asynchronous job-processing platform in **Spring Boot** and **Redis** that execute tasks on a concurrent worker thread pool with a scheduled poller, and re-enqueues failures with backoff
- Built a **Next.js** dashboard with real-time progress streaming over **WebSocket** (STOMP) alongside rotating refresh tokens, role-based access control, and Redis fixed-window rate limiting

QuickCompare - Real-Time Price Comparison Engine

[quick-compare.app](#)

- Developed a **FastAPI** backend with async **Playwright** scrapers for live price extraction across Blinkit, Instamart, and similar quick commerce platforms, with **RapidFuzz** for product name normalization
- Designed end-to-end data pipeline (scraper → processing → Redis cache → REST API → Next.js UI) significantly reducing repeated query latency

Skills

Languages: C++, JavaScript, TypeScript, Python

Frontend/Backend: Next.js, React.js, Spring Boot, Node.js, Express.js,

Databases: PostgreSQL, MongoDB, MySQL, Redis, Supabase

Tools & Platforms: Prisma, Mongoose, Docker, REST API, Git, Vercel, Postman, Playwright, AWS, Bugsnag

Core CS: Data Structures & Algorithms, System Design, OOPS, DBMS, Operating Systems, Computer Networks

Education

B.Tech, Computer Science & Engineering

Sept 2023 – May 2027

Bhagwan Parshuram Institute of Technology, New Delhi

CGPA: 8.12/10

Achievements

- Secured **Top 3** at **Ctrl+Alt+Hack (NSUT)** and **Top 7** at the **MAIT Hackathon**, each among **100+ teams**
- Selected for the **Smart India Hackathon (SIH)** at the college level in **2024** and **2025**
- Solved **400+** DSA problems on **LeetCode**; participated in hackathons organized by **Hansraj College**, **IIIT Delhi**, and **Bennett University**
